

Plus the instruction: “write the note for this board, quoting the lecturer word for word and pointing at the boxes by number”

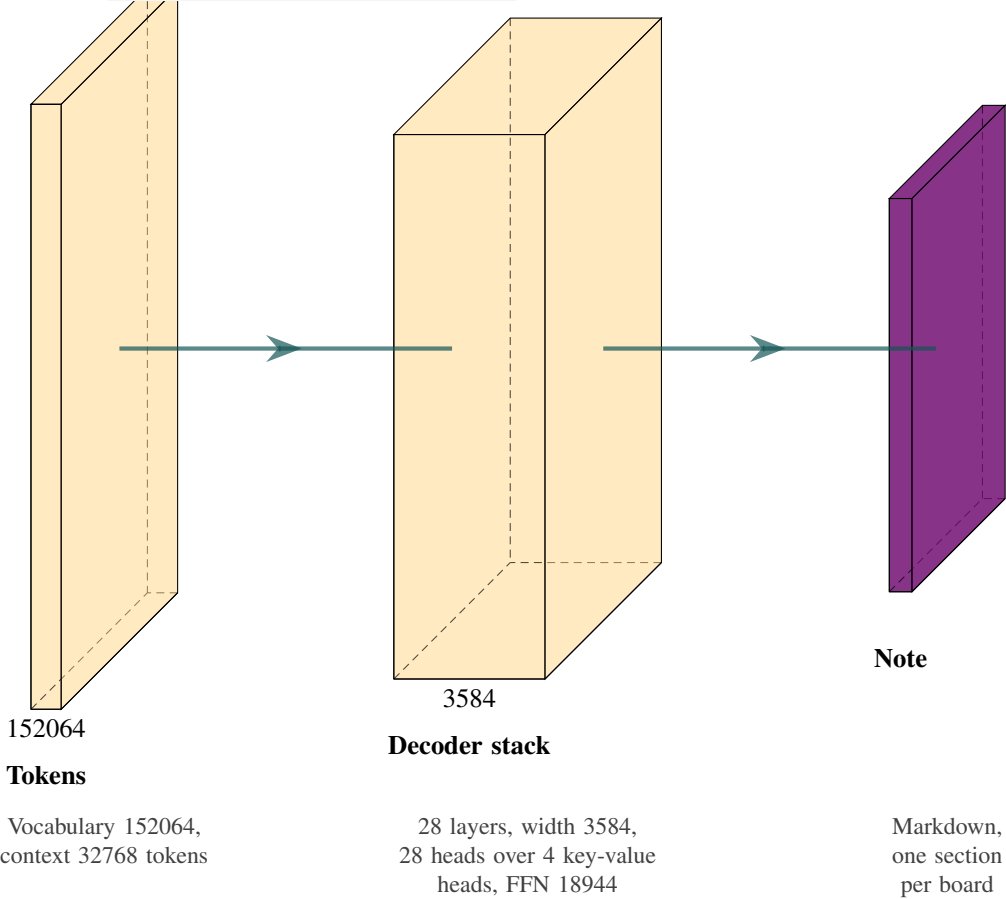

transcript for this board

so first ele ami pabo 0 0 equals to 0, 0 1 equals to 1, 1 0 equals to 1, 1 1 equals to 0. x or banano amar shesh. ekhon eitake ami not kore felbo. not mane ki? inverse ta baupar felbo.

board text from the vision model

box 2 "Truth table"
X-NOR gate: X-OR+NOT
A | B | A(+)B | A(+)B bar
box 3 "Gate symbol"
box 5 "Formula"
X-NOR -> A bar B bar + AB

The real transcript and board text for one board of BanglaASR11

This model never sees the board. It receives only the text the vision model returned, which is what makes the note checkable: every fact in it can be traced to a line of that text or to the transcript.
